FEATURES

- DASHBOARD (EASY and centralized platform to manage clients)

- Live chat with customers, with history and attach files, urls, videos.

- Information of each client (Address, contact, location)

- Calendar, tasks, installation dates, payment dates, invoices

- Make binding personalized quotes from the platform or upload your own budget

- I send documentation to the client through the platform, it hangs and the client has access, paper savings, Warranty, Manuals, ... Online activation warranty

- Sales report, money spent, money earned, monthly history, best-selling models, by project. List expenses associated with a project.

- Ease of managing and billing your clients for extra work, repairs, maintenance, Always collect in advance without surprises.

- Project planner, requirements, do not forget anything, without setbacks, alerts to notify the client that he has to do his part (call electrician)

- Once the client has accepted a supplier's budget, that client is automatically disabled for the rest of the suppliers (for that project).

- Offers are sent to all validated suppliers that have the product, companies have a maximum of 48 hours to reply, if they do not reply, they lose the customer.

- My Administrator account must be able to do everything:

Cost control of each supplier

Possibility of blocking provider

Possibility to change lead prices

Possibility of validating new suppliers

Ability to see all the offers that suppliers send to customers

Know with which supplier a client has closed the project

Possibility of reviewing the reviews

Update calculator prices and add models

Create news

Manage Forum

Ability to create new pages with content
